Intelligence & Security

Protecting the System - Protecting the Warfighter - Protecting Freedom

Our Intelligence and Security team operates under the highest standards when providing support to federal and commercial clients. We work together with the department of defense and intelligence community to mitigate threats and manage secure operations. We recruit top professionals from our robust recruiting network to deliver proven solutions. Our experts work proactively with our customers to develop and implement Intelligence and Security solutions across the United States.

Counterintelligence

LSINC Intelligence and Security professionals conduct CI activities to detect, identify, assess, exploit, penetrate, degrade and counter or neutralize foreign intelligence collection efforts, sabotage, espionage, and terrorist activities.

Supply Chain Risk Management

LSINC provides expertise in System Security Engineering (SSE), Program Protection (PP) and Supply Chain Risk Management (SCRM) to mitigate and manage risks to advanced technology and mission-critical system functionality from foreign collection, design vulnerability or supply chain exploitation/ insertion, and battlefield loss throughout the acquisition lifecycle.

SCIF Management

LSINC Security and Intelligence professionals assist with requests, inquiries and direction from Senior Leadership to perform the daily operations activities for Sensitive Compartmented Information Facilities (SCIF), including detailed recording, tracking, and reporting of information.

SAP Office Operations Management

LSINC office operations professionals provide executive support to Special Access Program Central Office (SAPCO) Directors to execute the daily operations of SAP facilities.

Insider Threat

LSINC Insider Threat professionals assimilate, evaluate, and interpret multiple sources of information to detect foreign intelligence, criminal and insider threats. Activities include assisting with drafting requirements and gathering relevant information from the Intelligence, Law Enforcement, and CI communities.

Program Protection

LSINC Program Protection professionals plan and assess antiterrorism, physical security, and insider threat programs to deliver trusted systems and ensure that programs adequately protect technology, components, and information.
